CONVENTION OF COLLEGES MEETS

Dean Boyd Is Chosen Member of Executive Committee at Meeting in Lexington Last Week

NEXT SESSION TO BE HERE

Dean Paul P. Boyd, of the College of Arts and Sciences of the Univerof Arts and Sciences of the University of Kentucky was chosen as one of the members of the executive committee at the Convention of Kentucky colleges, which was held in Lexington last Saturday. The meeting was the most successful that has been held since the organization of the association, there being 108 mem-

The opening address was made by Prof. Lewis R. Akers, of Asbury College at Wilmore, president of the Association of Kentucky Colleges and Universities. In his address Professor Akers declared that this is an age of asininity, in which the youth of the country are unable to dis-tinguish between license and liberty. said that only the rules laid down in the Bible can set the continent right side up. Other menaces of the ent civilization, according to Professor Akers, are: psychological fear, political fear, economic fear, historical fear, administrative fear, and moral fear. He detailed each

Commodores Defeated Western Normal by 41-20 Score Last Week

(By WARREN A. PRICE) The Wildcat basketball ship, which has weathered one out of six storms, will drop anchor tomorrow night in her own harbor and attempt to re-sist the invasion of a man o' war manned by a superbly trained crow of Commodores from Vanderbilt Univer-sity. Hostilities will commence at

The Commodores will steam into Lexington with one of the most re-presentative outfits in the Southern Conference basketball lake. The team is intact from last year with the exception of one man. Last year Van-derbilt fell before the Kentucky cagers by a 30-20 score. Vanderbilt wound up an extended trip through the North last Saturday, where they made an impressive record against Yankee quintettes. One Kentucky team has so far been played by the Tennessee institution, Western Normal falling victim by a 41-20 count. On Vanderbilt's aggregation, Kentucky tucky is represented by Joe Stewart, of Owensboro, who plays a consistent bang-up game at center. Bridges and Baker, Vandy's forwards, are re-ported by Nashville sport authorities as having as uncanny eyes for the basket as any pair of goal-shoot-ers in the South. McCall and Moss

ESPERANTO CLUB TO MEET WEEKLY

Language Is Urged to Promote Peace of the World; 5,000,-Speak It

PROF. JETT INSTRUCTOR

Much interest is being manifested in the proposed Esperanto or uni-versal language, whereby all nations others by a common auxiliary language. On the local campus, an Esproximately thirty members who meet every Friday night at Dicker Hall under the supervision of Professor C. C. Jett of the College of Engi-neering, for the purpose of studying

The following is a review of the language from a recent issue of the New York Times.

Esperanto, which has been promot ed as a means of explicit speech and clearer understanding between races, was used recently in a London marriage ceremony to give extra emphasis to the bride's "I will." When the bride signifies her willingness to Mr. Hunter Green, of Louisville, enter the wedded state by replying Ky., visited at the Sigma Chi house "mi volas," it was recognized that "mi volas," it was recognized that Esperanto was entering the practical

In recent years the world has greatly increased its interest in the socalled auxiliary languages. About 300 of them have been devised in times past. A language that all nations could clearly understand and easily learn was first discussed in the Roman Empire. In the days of the Caesars a single world language was thought necessary because there was Monday at 12 o'clock the Kappa Delta Alumnae association gave their Nations which seeks unity and un-

derstanding among many powers.

The project for a world language has long been the plaything of philosophers. Advocates of an interna-tional language have in the past included numerous philosophers and scientists, among whom are Roger Bacon, Descartes, Pascal, Locke, Vollingo, Volapuk, as forbidding as its Ivory soap sculpturing has taken name sounds. It was a jumble of German and English, comprehensible Esperanto. Its name carred a hope which in the past four decades has become a reality. Esperanto is today being spoken, it is reported, by 5,000,

that chiefly in Russia. After the lapse of a decade, a start was made to introduce the Zamenhof idea among College will no longer depend upon the Norwegians and Swedes. They, liam E. MORE "BLAH"

On November 24 there appeared in a leading Chicago journal, an article entitled "Soul Freedom? Blasphemy? O For Crying Out Loud" as a defense of the modern college girl. A little later another article appears: "Do Do They Swear? Sure They Do-They Like It." These are but two recent examples of the great epidemic of such literature that is sweeping the

Seemingly reformers all over the country have turned their microscopic examinations to college men and women. So-called journalists, novelists and playwrights, sensing the lucrative value of anything scandal ous, have been quick to seize upon any irregularities of conduct, and to so magnify and distort them as to best serve their great Mammon. The powerful motion picture industry has been drafted into service and joins forces with the journals, "best-sellers," and legitimate stage in broadcasting a distorted view of college life.

We do not claim to know much about college lifewe are only college students and can not be expected to know nearly so much about ourselves as others know. But we can assure reformers and the general public that as long as they continue to look for nothing but faults in college men and women their search will not be fruitless. College students are not all perfect. Neither are all movie actors, baseball players, professional men, "leading citizens," and zealous reformers. There is an the greatest and noblest men who ever lived-but who other than the scandal-monger cares to know the disagreeable facts in these men's lives.

It is our personal opinion that 90 per cent of the matter being written and gossiped about college students is nothing but "blah"-untruths, misstatements, and exaggerations. As such it is not worthy of the attention of any serious-minded thinker. There is no doubt that today there exists a great amount of moral corruption everywhere-in politics, business, social life, and colleges Ample opportunity is afforded for reform in all of these. But let's be sure that what we are striving for is correction and not idle gossip and fatter billfolds for those who exploit evil

Let's eliminate the "hlah" and talk about something else for a change.

"IS THERE A GOD?"

Despite some protests against the holding of such a debate, it now seems reasonably certain that on the evenings of February 1, 3, and 4 there will be held at Woodland auditorium in this city a debate on the proposition "Is There a God in the Universe." The affirmative side will be taken by Dr. T. T. Martin, a Baptist minister, of Blue Mountain, Mississippi, secretary of the Anti-evolution League of America, and the negative of the proposition will be taken by Charles Smith, of New York, president of the National Association for the Promotion of Atheism.

Individuals differ radically as to the value of a debate of this nature. Those who favor this debate say that its sole purpose is to arrive at the truth, and that neither theologian nor atheist should fear the truth. They maintain that it is better to know the truth, no matter what the cost may be.

The Kernel agrees heartily with the contention that it is well to know the truth at any cost. But it is not yet convinced that a debate of the nature of the one which will be given here will aid materially in arriving at the truth. It is by no means sure that this subject (which has been uppermost in men's lives since before the dawn of history) can be threshed out in a few hours time by two men, however learned in the subject they may be. And then it wonders if perhaps these two men representing the extreme in beliefs-pure atheism and fundamentalism of the sternest order-may not range from their subject and argue on fundamentalism versus modernism, a subject entirely out of the scope of this

Again this paper repeats that it does not fear the truth, whatever it may be. But it does think that this debate is to be deplored in that it is likely to raise doubts in the minds of persons who are at an age when they are unable to reason with safety. In other words

The Kernel fears that the final outcome of the debate may be doubt and not truth

However, this paper does not agree with som citizens who now ask that the civic authorities forbid this debate. The Consitution of the United States guarantees freedom of speech and this debate must be held now unless, as does not seem likely, it should be called off by the participants. But in its opinion the whole situation is a most unfortunate one.

THE COLLEGE Y. M. C. A.

A literal bombshell was exploded in collegiate circles few weeks ago when one Richard Dve. hither-to-fore unknown in literary and journalistic circles, made his bid for fame by writing for the American Mercury an attack on the College Y. M. C. A .- an article expressive, boldly written, and plainly stated. In no uncertain terms Mr. Dye termed the "Y" a failure and an incongruity on the modern university campus. Provoked by this attack, a great amount of criticism and appreciation of the work of the Christian Association has been uttered by educators, religious workers, newspapers, college stu-

Mr. Dye's criticism is sensational, and as such is eagerly seized upon by the ever-present pessimist and destructionist. It is in part true, and as such it should be carefully studied and used by the Y.M.C.A. in correcting defects. But it is in a large degree exaggeration and founded upon a total lack of knowledge of the subject, and as such the article is greatly discounted by thinking people.

On many university campuses, the Y. M. and Y. W. C. A. are the only religious organizations. They encourage and are responsible for a goodly percentage of the student attendance at church services; they lead in the establishment of religious discussion groups—an innovation in college circles which has grown to large proportions and influence; they conduct a program of social service which interests many students in such work; they furnish clean and wholesome social entertainment for the student body; they maintain employment bureaus, help new students find rooms, help freshmen "feel at home" in their new surroundings, direct vocational guidance programs, furnish advice, and in innumerable other ways exert an indirect but powerful force for Christianity and right on our university

The Y. M. C. A. is by no means perfect. Its appeal at the present time is more or less limited in the way of social entertainments to the unorganized element on the campus—the fraternity men and women find such recreation in their own cliques. Its work is limited but

After a consideration of the merits and faults of the College Y. M. C. A. we feel that its good points far out-weigh its bad ones. The idea of Christianizing the university campuses must be developed and the system improved, but it must be remembered that the College Y. M. C. A. is still in its infancy, having been establish only about a quarter of a century ago.

Give the College Y. M. C. A. time and encouragement and it will work out to the satisfaction of everyone interested.

THIS AND THAT

And now a man up in New York state smacks down \$1,250,000 to found a new college, the principal aim of which will be to qualify girls for matrimony. We suggest a better idea: why not endow a school for the purpose of teaching fish to swim?

According to the Romany posters which blossomed out on the campus last week, all the would-be shieks of the campus can now throw away their bottles of Listerine and buy a Romany season ticket and still be assured of everlasting popularity.

LITERARY SECTION

VIRGINIA BOYD, Editor

This week The Kernel is offering a few samples of what the "other generation" is doing. The Scribblers Club, composed of members of the faculty and town people having literary ambitions, have recently published very artistically bound volumne entitled "Scribblings." This volumne is a potpourri of poetry, prose, allegory ature writing and is arranged in a very attractive way. The following poems are excerpts from this book, and after reading them, any students wishing to purchase the whole delectable copy for himself, can get it at the Colony Book Shop.

CREED

He never knew what Darwin said; What Moses wrote he never read; But every night he bared his head In sweet communion with the stars. And every morning when the bars Of darkness tumbled down he fled To mountain tops whence he could see The superhuman jubilee Of Dawn, till earth and every tree Were filled with fire and song that seemed An anthem of the world redeemed. So Enoch walked with God and knew That Nature's miracles are true; That sin is blindness of the soul Which Love and Beauty can make whole.

-Cotton Noe

MY DANCING STAR When I was born a star danced above the crescent me I heard the sound of tripping feet On the Milky Way's eternal street And the spheres were all atune.

You of fixed stars, so staid and prim who look askance at me.

Your pulse would quicken if you could hear Echoing music far and near And laughing faint and free.

The lure that is for me alone, that I must follow afar; For the mist is a floating dancer's veil, The distance beckons and down the trail I follow my dancing star. -Jessie S. Miner.

THE MESSAGE OF THE SEA The message of the sea, dear heart—the message of the sea!

The white foam breaking into spray. The rise and fall of water gray, And wild winds blowing free! The wild winds blowing free, dear heart-and gulls on

outstretched wings, The white gulls wheeling in and out, And mad winds whispering all about, Of secret, hidden things;

Of secret, hidden things, dear heart-what may their whisperings mean? Below the restless, surging sea-

Above the calm eternity-And the rush of wings between

RELIGIOUS DISCUSSION

THE CHRISTIAN'S USE OF THE

Thy word is a lamp unto my feet, and a light unto my path. Deuteronomy 6, 4-9 2 Timothy 3, 14-17

There are four ways in which to acquainted with its beauty spots, and this, of course, is the way in which the great majority of people know the Book. Some of the choicest narratives in the Old Testament, notably the matchless stories of Joseph, a few of the greatest Psalms, select sam-ples of the resonant eloquence of Isaiah, a few of the parables of Jesus and the Sermon on the Mount, some of Paul's supreme passages, especially the thirteenth chapter of First Cor-inthians—such is the Bible which

The second way to know the Bible is to know its individual books. Many a men has vainly struggled to find the Scripture, like a collection of prophetic sermons in the Old Testa-ment or an epistle in the New, and then, discovering what the book really is about, what kind of man wrote it, to whom he wrote it, has seen the light break and that what was dull and opaque has become luminous and clear. To read the books of the Bible without knowing their vivid settings is like listening to one-half

A third way to know the Bible is to know its characters. For the Bible is biography, and he who would understand its meaning must famil-iarize himself with the men and wonarize himself with the men and wo-men who throng its pages and illus-trate its truths. Its men and women must be real people in his imagina-tion and his affection. He must come up to what the Bible says by way of the lives through whom the Bible says it, until Amos the shepherd of Tekoa or Hosea of the ruined house and broken heart, Peter the vacillating rock, or Paul the indwelling Christ and the unconquerable passion for Christ, are his familiar friends.

But indispensable as are these three ways of knowing the Book; all of them together are not enough. Only as man is able to trace up through the whole Scripture the development of the structural ideas does he really know the Bible.

To start with God conceived like a man who walks in the garden in the cool of the day, or as one who comes down from the sky to confuse men's speech lest they should build their tower so high as to reach his from the beginning until in the New Testament God revealed in Christ as the spiritual Presence in whom we live and move and have our being, whose name is love, and whose temples are human hearts; and to be able in any book or passage to locate one self with reference to this progressive revelation of the meaning of God
—that is to know the Bible.

Not only can we believe that the Bible does represent a progressive revelation, but we can clearly and in detail watch it progress. We can know where the Scripture's major ideas started; we can trace the routes they took; we can watch them in periods of rapid travelling and in days when the going was difficult and slow. We can enter into their defeats, their hair-breadth escapes, and costly victories; and we can see the way the Gospel of Jesus carried them up to a great height "not to destroy but to fulfill."—(Condensed from an

Resists Corrosion

THIS picture, taken in the salt marshes near Kearny, N. J., shows two lines of 30-inch Cast Iron Pipe replacing pipe made of other material. The alternate exposure to the action of salt water and air is a severe test.

While the pipe shown in the picture is subjected to unusual corrosive influences, all underground pipe must be able to withstand corrosion to a greater or less degree. Cast Iron Pipe has this quality. It does not depend on its coating to resist rust; the material itself is rust-resisting. The first Cast Iron Pipe ever laid is in service today at Versailles, France, after two hundred and sixty years' service.

PREVIEWS OF LOCAL SHOWS

KENTUCKY THEATER

"THE BLONDE SAINT" Romantic adventure is the key-ote or "The Blond Saint," which brings Lewis Stone and Doris Kenon to the Kentucky this week "The Blonde Saint" is distinctly different from the general motion picture feature of the year in that here is none of the flapper and cabaret and jazz element.

A love affair on a Sicilian island forms the story, which was adapted by Marion Fairfax from Stephen F. Whitman's novel, "The Isle of Life." Besides Lewis Stone and Doris Kenyon, the cast has Ann Rork Gilbert Roland, Cesare Gravina, Malcom Denny, Albert Conti and a number of

other well-known players.

"The Blonde Saint" was produce by Sam E. Rork for First Nationa

Pictures. Svend Gade is the director "THE SILENT LOVER"

"The Silent Lover," First National newest starring vehicle for Milton Sills, will open at the Kentucky nex Sunday for a three day run. The story adapted by Carey Wilson from the European success by Lajos Biro entitled "The Legionaire," is described as a thrilling one, dealing with the skirmishes between the Foreign Legion units stationed on the edge of the Sahara and the marauding Riff tribesmen, who constantly harry Eu-ropean travellers and residents in

Sills is cast as a dissolute young diplomat, who loses his honor in Paris only to regain it—and win the gir he loves—on the burning sands of Southern Morocco. Supporting him is a notable cast of screen favorites, in-cluding Viola Dana and Natalie Kingston, Montagu Love, Arthur Carew Charlie Murray, Arthur Stone, William V. Mong, Alma Bennett, Claude King, William Humphrey, and others.

BEN ALI THEATER

"THE BIRTH OF A NATION"
D. W. Griffith's master production,
The Birth of a Nation," a United Artists release, will be the attrac-tion at the Ben Ali Theater, Sunday. It covers the essential details of American history ranging through three centuries. Actual batles are shown with tens of thousands of sol-diers in the conflict. 18,000 people participated in the telling the story. total cost of the entire production was in the neighborhood of \$500,000.

The narrative is filled with tears and smiles. A brilliant cast lends animation to the story. The list of present stars and film favorites includes such well known screen artists as: Henry B. Walthall, Lillian Gish, as: Henry B. Walthall, Lillian Gisn, Mae Marsh, Miriam Cooper, Mary Alden, Josephine Crowell, Ralph Lew-is, Joseph Henabery, Raoul Walsh, Donald Crisp, Howard Gaye, George Seigmann, Walter Long and Elmer

"WAR PAINT"

Women, now protected from practically every harm which might befall them and who undergo practically no hardships, will find a lesson in "War Paint," Metro-Goldwyn-Mayer's initial western drama starring Col. Tim McCoy coming to the Ben Ali Monday for a three day run.

SEES 'BAMA PLAY

Is Guest of Southern Champions at Game With Stanford at Pasadena on New Years

Day

In Recynole 1.

In Recynole 1.

Boy Magazine, is simplicity. He uses no "trick" plays—no charts or "set" formations. He depends first upon having his men in topnotch shape, so that they can play the full game at a driving speed. Second, he sees to it that they know a little more than their opponents do about the mechanics of the game.

Coach Meevan starts his season in

Coach Meenan starts his season in November, on the running track. In December comes drill in running the floor and passing. Columbia uses just one pass—a shoulder high throw propelled by the right hand. She uses only two shots for the basket—the chest shot, easily and gracefully exe-cuted, and a variation of it, delivered with one hand, when near the basket.
"English," snap passes, other fancy tactics are unknown to the Columbia

Coach Meenan's system of play depends upon three primary rules of offense and defense:

"On defense, always keep between your man and the basket, forcing him

your man and the basket, forcing min toward the side lines. "On offense, never catch a ball standing still; keep your opponent from intercepting it by going to meet

"After you have completed a pass get ready to receive the ball again."

Coach Meenan doesn't like the drib-ble because it momentarily ties up the other four men on the team.
"Never dribble," he advises, "unless
you are coming up to the basket for a
shot and there's no one in front of

louser, was a spectacular represen tation of California cities, five miles in length. Each city sent a float made of roses, giving remarkably beautiful effects. The Beverly Hills float was a ship of roses surrounded by a sea of waving ferns. Several movie stars also had places on this float.

Besides the 60,000 people who saw the game \$100,000 was returned to

But with all California seemingly made famous in song and story and their hosts of filmland beauties, Dr. Funkhouser insists that he saw no of Kentucky and no prettier girls than the girls that grace the university

campus.

California plays no better football than the south as Alabama has shown one way in which California does ex-cell and that is in their method of cheering. The Stanford students are cheering. The Stanford students are trained in their respective positions in the stands and their sentiments are expressed by written cards in an impressive and spectacular manner which the undignified yell leader cannot hope to imitate, according to Dr. Funkhouser.

COLLEGE EDUCATION WORTH \$72,000.00

Based upon statistics of earnings of students and graduates of the col-leges of business administration of Boston University and other colleges, The Massachusetts Department of Labor finds that the four years spent in college net the average college graduate \$72,000.00. They report the total earnings of the high school graduate between the ages of 18 and 20 to be \$78,000, while the college man's earnings from 22 to 60 they estimate to be \$150,000.—Exchange.

WITH OTHER COLLEGES

Gene Tunney criticizes colleges for not making boxing more of a sport. He thinks they should award letters to the boxing teams. Perhaps most of the team members would only get a sport of the team one to ten in a slow numerals-from one to ten in a slow

George Washington university de cides freshmen- sophomore supremacy by a tug of war, with 25 men pulling on each end of a strong rope. A stream of water from a fire hose is the goal. He who gets pulled, in this case, gets wet.

The University of Wisconsin is the first to offer danging as a major course in its curriculum. The course entails four years' work, sciences and agricultural studies being included as well as dancing. The aim of the course is to develop personality and appreciation of art through knowl-

edge of dancing. The use of automobiles is now per-mitted at Ohio Northern university. "I haven't any objection to a student owning a car if he is discreet in using it," said President A. E. Smith. "However, I will not tolerate anything like howling students riding up and down the streets in cars at all

the ball under the basket in as few passes as possible, for short, sure shots. To combat this syle of play, Princeton—then the eastern champion—placed guards right under the hoop. Columbia met this maneuver by loosing a barrage of medium-length shots from a point squarely in front of the basket. When a few of these dropped through the net, the Princeton guards came out and permitted Columbia to make short shots again.

"Always keep the area under your basket clear," Meenan advises. "Stay away from it until somebody is ready"

"The American Boy

half, Columbia hit her stride and took the lead 29 to 13, scoring 18 points years that the Cats were defeated by another Kentucky team and a result their chances for the State champion—ship this season have been practically in just seventy-five seconds, the Navy scored 11 points and won the game 30 to 29.

"You can't win every game," Meenan advises. "Stay away from it until somebody is ready"

"The American Boy

half, Columbia hit her stride and took the lead 29 to 13, scoring 18 points years that the Cats were defeated by another Kentucky team and a result their chances for the State champion—ship this season have been practically in just seventy-five seconds, the Navy scored 11 points and won the game 30 to 29.

Kentucky Ties Count Twice But Lacks Punch To Put Over Sufficient Markers for Victory

Winchester, Ky., January 11-The Wildcats of the University of Kentucky struck a wall in the Kentucky

finish, Kentucky was fighting uphill, ipating in the intra-mural gain Wesleyan having gained a lead and During the season approximately stubbornly resisted every move by games will be played. There are their opponents to overtake it. The score was tied twice, but Coach Charlie Webb's boys always seemed to have enough strength in reserve to break the deadlock

An enthusiastic crowd witnessed the struggle and loud were the praises overjoyed at the prospect of a champ-

The final minute of the game found the Panthers stalling, but in doing so, they were only continuing their earlier performance of playing smart basketball. The Wildcats' offense, built around Paul Jenkins, was shatthe stellar little Wildcat leader so closely he could only break through to score two field goals. Ropke bore the brunt of the Cats' shooting, getting 10 points, several of them being the several of the sever tered when Captain Rouse guarded the stellar little Wildcat leader so the results of spectacular shots.

Wesleyan's team work never func-tioned better than it did Monday night, and while Dees, guarding Ken-tucky's goal, put up a splendid fight, he was unable to stop the steady flow toward the net. Hummel, Wesleyan forward, scored

10 points for his team, while three members, Captain Rouse, Galloway members, Captain Rouse, dan and Adkins got six points each.

Kentucky (24) Pos. Ropke (10) Knadler (2) (10) Hummel (3) Webb (6) Galloway (6) Adkins Helm (2) Dees G. (6) Rouse Substitutions: Kentucky—Phipps (3), Gilb (1). Referee-Lane, of Cincinnati.

Kentucky will play Saturday night at Lexington, meeting Vanderbilt's Commodores at 8 o'clock in the Kentucky gymnasium. Vanderbilt will be the second Southern Conference opponent of the Cats this season.

Sheepskins at Michigan University are isued with the graduate's name printed instead of being penned on, as is usually the case. The change has been adopted after seven years of experimentation.

Every man who recived a degree from the Boston College, graduate of

VOCATIONAL GUIDANCE

sure before you start that you're pick ing your job. Do your own deciding, and take time enough to investigate oroughly both yourself and the work you think you'd like to do. There. That's off my mind. What's next?" "Is it absolutely necessary for a fel-

low to go to college?"

"No," Mr. Casement says briskly. "But I'd go-for three reasons

"Here's one. If you go to an agricultural college, you'll accumulate much useful, up-to-date knowledge valuable to any farmer, but especially valuable to a town bred boy whose farming experience has been limited to working on farms in vacations.

"And here's another reason. If you go to a good agricultural college you're likely to meet some big men men who will help develop vision in you. Some of these men may be on your college faculty. Others may visit the college. And you may meet still others through winning special honors. For instance, if you go to Chicago on a stock-judging team, older man may invite you to lunch at the Saddle and Sirloin Club and introduce to a big ranch owner, or a prominent Chicago packer, or an Argentina cattle buyer. Such men give you glimpses of unusual oppor-tunities, drop ideas that spur you on.

'Sometimes, one of them can offer a boy an interesting chance. A promising cub I know, who had just completed his college course, got a chance to go down to Argentina with a bunch of cattle. The cub went, keen for the enough to pay him for the time he'd invest. He did better. He worked on a ranch down there for a year or so; came back home with a thousand dollars in his pockets and more than a thousand dollars' worth of knowledge about Argentine methods in his

"Of course, you won't be offered any such chance unless you make yourself good enough so that older men size you up as worth while.'

You grin a bit ruefully. You can do it," Mr. Casement nods. "And here's the third reason, a reason

The partners own 2,000 clears—the official figures show just acres of land worth now from \$25 to such cases-why, you'll keep records. O But first you've got to get your \$1.25 an acre for the land, buying it (CONTINUED FROM PAGE FIVE) farm. And buying land isn't so easy with borrowed money. He's made

You remember hearing about a young Iowa farmer who is fairly frazzling himself out to keep a farm he

bought on time. He bought when land was sky high, at something over two hundred dollars an acre. Ther came a spell of poor prices. That young fellow is working, worrying growing old—just to keep his interest paid. Can't do more. And he's a good farmer; has a fine head, was reared on a farm, and was graduated from an exceptionally good agricultural college. If he can't make a go of it, what chance have you?

"Precious little." Mr. Casement says "if you buy land at too high a price. But you needn't give up the idea of owning your own farm if you'll go flated and study prices and conditions before you invest. Decide what you want to try-diversified farm dairying, cattle raising, fruit growing Then buy your land, cautiously, intel

time you'll spend in earning money for your down payment. You'll be learning all the time, whether you are working as a general hired man, or managing someone's dairy, or acting as a county agricultural agent, or running a ranch hoodlum wagon—toting along the beds and rustling fire-wood and water for the cook. Many a man has earned his start in one of

"How do you get such a job?" you

"Fit yourself for it by hard work in college and in your summer vacations Then go after any good chance you can learn about from college authoriers are in demand.'

"That's good," you reflect. Then:
"But I wish I could be sure I'd like farming. So many people don't."
"I know," Mr. Casement nods

"Too many people try farming and fail. I can usually see why. Yet I'd not urge any boy into farming."
You both sit staring into the fire. Then Mr. Casement says suddenly "But I'd like to do this. I'd like to 'As a farmer,' he told me, 'you'll lead a more or less isolated life. Go to college and develop resources within yourself. If you enjoy reading and of Shorthorn breeders, making good thinking, you're not likely to get into prisingly good! We Hereford breed

learn more about farm accounting.

You realize, though, that "farming formation. Mr. Cornforth, Sr., has with pencil and paper" may make a big difference in your income. And his wife and son. They're regularly

ow to clear \$1,000 more in year than to mean tangles and delays," says Mr. Carnahan as you're leaving. \$30 an acre. Mr. Cornforth paid \$1.25 an acre for the land, buying it now," Dewey tells you quietly. You hate to leave. But you're a

> "But you bought your land from the government," you realize. "Could a young man without money get started out here now?'

"I know well some who have," Mr. Cornforth answers. "In the last few years, four different young men have worked for me, saved three or four hundred dollars apiece, rented farms on shares, then bought on time, and are now well on their way to full ownership."

That's good to hear. . . So is Mrs. Cornforth's, "Come to dinner now."

Dinner on a ranch! And such a dinner-roast chicken, currant jelly, candied sweet potatoes, Waldorf salad, plum pudding. You'll never tell how much you ate!

Then on to the Carnahan ranch, with Mr. Cornforth, Sr., making a congenial third.

As you drive along, you learn much about Al Carnahan and his six sons, ranging from thirteen-year-old "Towhead" to Dewey, the oldest, some-where in his early twenties. The seven Carnahans run the ranch. And they must run the ranch home, too, for the mother is dead. Shortly after her death, the father had a good chance to sell the ranch. But he didn't sell. Where else could a man bring up six boys, keep them all to-gether and contented?

"You couldn't get those boys away from it now," says Mr. Cornforth. "They're a happy clan. Dewey has helped his father a lot in making that ranch a real home; done a husky man's work on the place and at the same time looked after the nouse and the younger boys. They're great youngsters. Dewey's had a year or so at the Colorado Agricultural College, and some of the others will go this next fall. All but the two youngest have finished high school. Two of them took highest honors at North Denver High.'

Mr. Cornforth breaks off to point a sale pavilion you're passing. You read the name on it: "Elbert County Shorthorn Breeders' Association."

"Yes, we Shorthorn men around here got together and built it," Mr. Cornforth says. "We had to have some place to auction our cattle. We have 50 stalls there and 350 seats. It cost us \$1800.

You've heard about how farmers won't co-operate, about how group enterprises fall through. You know they do, all too frequently. Yet here Grand Championship prizes five years

Friendly Fighters Presently, you reach your Third Stop: The Carnahans' ranch.

You like broad-shouldered Dewey, who happens to be the first Carnahan you meet. You like his friendly, unabashed way of welcoming visitors, two of whom are big cattle men. You like his answer to Mr. Cornforth's bantering, "Can 'ou give us a job?"
"Well," Dewey grins judiciously,
"what can you do?" Then, dropping

humor for hospitality, he urges you to get out and come in. You're more that glad to do it. With friendly Carnahans swarming all around, you roam from yard to yard, visiting mild-eyed bulls, and springy-legged calves. Good-looking calves. Even you know that. And Mr. Casement fairly loses himself in scientifically analyzing one four-leg-

ged youngster's good points. Dewey covers his pleasure in an expert's praise with a good-humored jibe: "That calf would be all right if he only had a white face, eh. Mr

Casement?" The finest sort of rivals, these particular Shorthorn and Hereford breeders. Generous enemies. You hadn't realized that work on the land could hold so much of the best kind

of football spirit. Gaunt, grizzled Mr. Carnahan tells you proudly that there are 2,560 acres in the ranch, and 450 head of cattle on the place. "And I hadn't a cent when I came here."

You learn that they use about 2,000 acres as range and farm 500 acres. No place for a lazy man. They keep

busy, the Carnahans.
"I suppose you'll all be in partner-

KENTUCKY CONVENTION

topic, and stated that labor union tend to stifle genius. He said also that standardization in education and religion is following standardization in industry, and that a nation dies when its faith dies.

Dean B. M. Brifman made the only protest against the foregoing opinions. He said "I believe in the young people of today. They are as sound morally as young people have ever been. If the young people are going to the bow-wows, as the president says, it is the fault of the home, school, and church, which are not do-ing their duty." He was heartily ap-

Here's Your Chance Kernel Will Give Theater Pass Free Each Week

Someone once said, "it pays to advertise," all of which may be all right so far as we are concerned. The Kernel wishes to say, however, that "it will pay someone to read ucky one's name will be printed n an ad on one of the pages of The Kernel each week and if, on discovering his name, he (or she) ill call at The Kernel office he will be presented a double pass to the Kentucky Theater to be used s he sees best. You may be the iket winner this week, or perhaps text week--just read The Kernel ds, and make the Goats do it.

VANDERBILT FIVE

double season ticket, have been posted Northern teams and teams which are double season ticket, have been posted at various points on the campus. In fact nothing is being left undone to give each student and faculty member an opportunity to participate in the Romany enterprise.

The work on the new theater at the which is a very season ignoration.

cats spent this week in sessions of hard work, in an effort to make this season result in a half success at any second team made us of Weiman Heizer, Marshall, Polson and Wallace demonstrated from time to time that hey are capable of shading the firs team in scrimmages.
The probable starting line-up to

morrow will be: Ropke and Knad ler, forwards; Helm, center; Jenkin and Dees, guards. Of these men Dees has put up the most consistent game this year. His playing has bordered on brilliancy in nearly every game breaking up the enemy's offense with a precision like clockwork. Ropke after a poor start, has come into his ruar own, and is destined tomorrow night ana. to live up to the predictions that were made when he entered school a little over two years ago. Captain Jen-kins is one of the most sensational performers on the team, his lightning quick offense often stunning the opposition momentarily. Helm and Knad ler have played a fair game of basket-ball this year, with Knadler showing flashes of form at times that boosts Kentucky's stock 50 per cent while

DEAN F. PAUL ANDERSON

F. Paul Anderson, Dean of the College of Engineering, was born February 10, 1867 at South Bend, Indiana. His father, J. W. Anderson, a Scotchman, was an engineer and in-Scotchman, was an engineer and inventor of note and was superintendent of the Studebaker Brothers Manufacturing Company for 25 years.

Dean Anderson was graduated from and served as machinist and steam fitter apprentice at the Studebaker plant. In 1890 he was graduated from Purdue University where the next year he was a Fellow in Steam Enineering, building a large part of the apparatus in the steam laboratory at Purdue and doing all of the experimental work on the first Alden Absorption Brake.

In 1891 he was appointed Professor an investigation he had conducted at of Mechanical Engineering and Dean the university. The opinion was reached that within certain limits, employment is not detrimental. In the University of Kentucky, according to years Dean Anderson has devoted his untiring efforts in developing the five ployed men is considerably higher distinct branches of engineering—than that of employed men, notwithstanding the fact that three out of and Metallurgical Engineering. The gradutes of the college have for years

from American technical institutions. During the afternoon session, stud-ies in student health were held. Dis-leader in engineering educational socussions were given by Dr. R. H. cieties and the great technical sohe was chairman of the Section on American Agricultural Colleges and Experiment Stations, and for 25 years was Engineer of Tests of the Southern Railroad where he made a num ber of inventions now in use on the modern locomotive.

He was associated with Leon K Frankel and for many years the con-sulting engineering firm of Anderson and Frankel carried on responsible and extensive work in the Blue Grass.

In 1904 he was a member of the International Jury of Awards at the Louisiana Exposition in St. Louis. In 1921 Dean Anderson was appointed Director of the Research Laboratory of the American Society of Heating and Ventilating Engineers in coopera-tion with the United States Bureau Dean C. R. Melcher, of the University of Kentucky, read the first
paper on the program. It was entitOhio State co-eds.

and ventiating Engineers in cooperation with the United States Bureau
of Mines at Pittsburg. He is at present first vice president of the society ent first vice president of the society and has been nominated for the presency of the society, the election for

Will Show Movie

The Story of Power" to Be Given Wednesday

"The Story of Power" is the name of the picture to be shown in Dicker Hall on Wednesday, January 19. This picture is in three reels and shows the development of steam and electricity as sources of power from their beginning to the present. Reel one shows the early develop-

ment of the steam engine, a street scene in London, and Stephenson's locomotive, "The Rocket." It also shows modern uses of electricity, giant electromagnets, street and sign ighting, and an electric locome Several illustrations in animated photography complete this reel.

Reel two shows Niagra Falls and compares it with the fall of water at Big Creek in the Sierra Nevada mountains, a total of 2,062 feet, or more than 12 times the height of Niagra, and a view of the plant at Big Creek with more illustrations.

Reel three shows the building of a power plant for the Edison Electric Illuminating Company of Boston, which generated 400,000 horsepower of electric energy. It also shows the uits of power obtained per pound of coal from 1885 to 1925.

thing, and of eop and night dees, but neither one seems to apply particularly well here. It is a matter of increasing wonder to me that Kentucky hasn't long since acquired the title of
"New Holland."

In effect, you see how the winter season affects one of your number. Pray heaven, she may be the only

STROLLERS TO GIVE DANCE TOMORROW (CONTINUED FROM PAGE ONE)

been ordered and are expected to be been ordered and are expected to be received within the next few days. These pins will be distributed to members at a basketball game in the near future, it was announced at the meeting Monday afternoon.

Regular meetings of Strollers are held on the first Monday of every month in White hall.

According to agricultural economist, the United States can support a population of 350,000,000 people.

What he didn't learn at college

Lawrence Day Howell, Princeton, Litt. B. '13, E. E. '19, never heard of marine applications for

In his class work,

electrical equipment. In fact, they were practically unknown. Yet he now is in charge of the Marine Section, Transportation Division, of the Westinghouse Sales Department, located at New York.

When Howell came from college to the Westinghouse Graduate Students' Course, he had twelve months of thoroughgoing work in the shops at East Pittsburgh. Then he decided he wanted to enter the field which seemed most undeveloped

'What's the future with a large organization?" That is what college men want to know, first of all. The question is best answered by the accomplishments of others with similar training and like opportunities. This is one of a series of advertisements portraying the progress at Westinghouse of college graduates, off the campus some five-eight

and perhaps most promising of broad expansion. This was marine engineering.

Not five per cent of the present opportunities on the water have been opened for electrification. Yet there is more horsepower, in prime movers, on the ocean than there is on the land. In Howell's undergraduate

days, this field was scarcely scratched-just as radio was not known to many young engineers when they were in college. A college man's opportunities are not limited to the electrical developments now in existence.

In marine applications an order may assume large proportions. A single installation, negotiated by Howell recently, of the newly-developed Dieselelectric drive for a yacht, totaled \$175,000. Such sales are not made overnight. They result from understanding fully a customer's needs.

To men with the knack of taking the other fellow's point of view, a career as Sales Engineer at Westinghouse brings returns in personal satisfaction as well as in worldly reward.

Westinghouse
